Adding Extra Fields for Application License in NI

To add extra fields for Application License perform the followings steps:

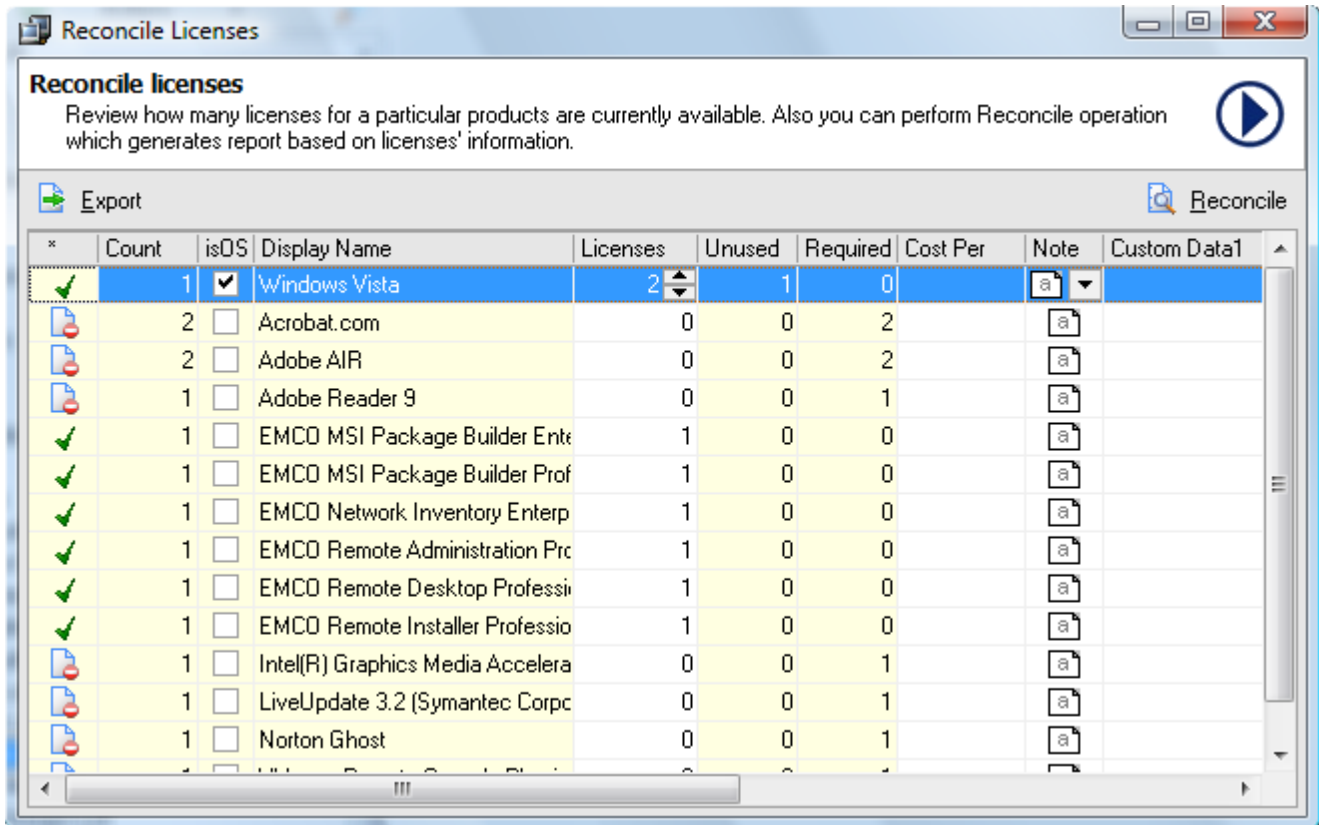

1. Switch to **Options** tab.
2. Expand the **Application License Extra Field** node.
3. Type in the display name of the 1st extra filed in the **Extra 1 Display Name** field.
4. Type in the display name of the 2nd extra filed in the **Extra 2 Display Name** field.

5. This will add you custom fields for Application License.

To add data to your custom fields perform the following steps:

1. After creating extra fields; switch back to the **Manage** tab.
2. Expand the **Management Tools** node.
3. Expand the **Installed Applications** node.
4. Click **Reconcile Licenses** node under **Installed Applications** node.
5. **Reconcile Licenses** dialog appears on the screen.

6. Type in you custom data 1 in your **Custom Field 1** column corresponding to the required application name.
7. Type in you custom data 2 in your **Custom Field 2** column corresponding to the required application name.
8. This will add your data to the required fields.
