How to update NI 4.5 database for NI

1. Open the installation directory of the EMCO Network Inventory 4.5 (usually %ProgramFiles\EMCO Network Inventory 4.5).
2. Right click Data folder in the EMCO Network Inventory 4.5 installation directory; a pop-up menu will appear on the screen.
3. Select Copy from the pop-up menu item to copy the machine data.
4. Open the EMCO Network Inventory 5 installation directory on the destination machine.
5. Right click the Data directory icon.
6. Click Delete menu item from the pop-up menu.
7. A confirmation dialog appears on the screen.
8. Click Yes button.
9. This will remove the existing data folder.
10. Right click in the EMCO Network Inventory 5 directory.
11. Select Paste menu item from the pop-up menu.
12. Run EMCO Network Inventory 5.
13. A dialog appears on the screen saying: "Your database tables are out of synch, to upgrade the tables" click Yes button.
14. Click Yes button.
15. This will start converting the database to EMCO Network Inventory 5.
16. When the upgrade is complete you will be informed that the upgrade is done.
17. Click Ok button.
18. You have now successfully imported the data into EMCO Network Inventory 5.
